EDUCATION

Northeastern University, Boston, MA

Jan. 2026 – Present

Khoury College of Computer Sciences

Expected Graduation: May. 2028

Candidate for Master of Science in Data Science

Related Courses: Essentials of Data Science, Algorithms

Stanley College of Engineering and Technology for Women, Hyderabad, India

Nov. 2021- May.2025

Bachelor of Engineering in Computer Science

Related Courses: Data Mining, Programming in Python, Machine Learning, Database Management System, Cloud computing,

SKILLS

Programming Languages:	R, Java, Python, MySQL
Libraries and Framework:	NumPy, Pandas, Scikit-Learn, OpenCV, Flask
Machine Learning:	Supervised Learning, Classification, Regression, Feature Engineering
Tools:	Git, VSCode, Jupyter Notebook, Power BI
AI Tools:	Claude, ChatGPT, GitHub Copilot, Prompt Engineering
Certifications:	Data Analysis and Visualization with Power BI, Data Modeling in Power BI

PROFESSIONAL EXPERIENCE

Ernst & Young Associates LLP, Hyderabad, India

July. 2025- Dec. 2025

Analyst

- Developed Python-based automation pipelines for enterprise-scale data processing and transformation.
- Performed large-scale data cleaning, validation, and preprocessing to improve workflow reliability.
- Collaborated with cross-functional teams to design data-driven solutions for technology projects.
- Optimized analytical workflows by reducing manual processing through automation.

ACADEMIC PROJECTS

Semantic Data Intelligence Platform

May.2026 – June.2026

Python, streamlit, Pandas, Plotly, Data Quality, Knowledge Graphs

- Developed an interactive platform for semantic dataset discovery, trust assessment, and relationship mining across heterogeneous datasets.
- Implemented trust scoring, semantic relationship graphs, dataset matching, geospatial analytics and automated exploration using Python, Streamlit, Pandas, Plotly and Data Quality methods

Bike Rental Demand Prediction

April.2026 - April.2026

Northeastern University, Boston, MA

- Developed and trained a Logistic Regression model and optimized the analytical workflow for predictive performance.
- Evaluated model performance using ROC-AUC and other classification metrics, and interpreted feature contributions to generate actionable insights through visualizations.

Large-Scale Predictive Modeling on 1M+ Crime Record

Jan.2026 - Feb.2026

Northeastern University, Boston, MA

- Built an end-to-end data science pipeline analyzing 1M+ Los Angeles crime records. Developed logistic regression classifier (AUC = 0.63) and interpreted model results using odds ratios and feature importance visualization
